

## Pyroban 3GP™ Product Support Retirement

Dear Valued customer,

After launching in 2000 and bringing a real alternative to fitting Exhaust flame arrestors for ATEX Category 3G Well service and production Diesel engine applications, Pyroban's groundbreaking 3GP™ system is retiring. Final prime product orders for the system were accepted in 2013. Spares have been available for the last 4 years, but we are now reducing the spares availability. These critical parts will be available to buy until December 2022. Gas Detection heads and calibration gas will continue to be available until further notice.

Part Number	Description
300807037/C	Gas Sensing Head : Offshore Gas Head (Type C)
300825936	3GP : Regulator Assembly : 1 Bar regulator, Switch at 15 bar
3010007895	Pressure Regulator : 3GP System : 1 Bar, No guage or swagelok
3010005642	Sensor : Speed Sensor : 5/8"x2.5" 40V O/P
300807161	PCA : Signal Io Pca 3Gp System
300807163	Relay PCA : Power Relay : 3GP
300816626	PCA : 3GP PSU II

Please contact:- [parts@pyroban.com](mailto:parts@pyroban.com) for all 3GP spares enquires.

The 3GP Successor is a new SIL 2 rated Higher integrity PLC based Flame arrestor elimination product is now available. Visit <https://www.pyroban.com/products/ex-scs-control-system/> or contact [sales@pyroban.com](mailto:sales@pyroban.com) for more information. The system builds on the 3GP system, but no longer uses a calibration test gas and now uses high speed infra-red gas detection heads.
