**PYROBAN®**

## RED PERIMETER LIGHT - ONE FOR ALL ZONES

**Red Ex Line™ is a compact perimeter marking warning system fully certified to minimise risk for staff working in hazardous areas**

In Zoned hazardous areas, pedestrians could be working in close proximity to trucks handling flammable materials. Multiple trucks may also be operating.

Red Ex Line™ increases safety where visibility is poor, such as warehouse aisles or crossings where IBCs and drums containing flammable material are handled.

Red Ex Line™ can be used where spillage or accidental release of flammable material may create an explosive atmosphere.

Suitable for production applications or facilities storing flammable material such as chemicals, solvents, waste, paints, whisky, foodstuffs and more.

Readily available for installation on any existing Pyroban equipment in the field (fitting must be conducted by person specially trained to fit these lights) and new orders (factory-fitted).

*The compact Red Ex Line is easily fitted by engineers trained on Pyroban systems used in Zone 1, 2, 21 and 22 hazardous areas.*

## PROTECTING PEOPLE IN HAZARDOUS AREAS FOR GENERATIONS

### THE PERIMETER LIGHT

- 3 x 3W LEDs
- Weight: 0.37kg
- 50,000 hour light life span
- IP6X
- Diecast aluminium construction
- The lights may be connected to a 12-48V DC source
- Dimensions: W76mm, H 72.5mm, D75mm

### THE EXPLOSION PROTECTION

- ATEX 2G/D compliant for operations in Zone 1, 2, 21 & 22 hazardous areas
- Ambient temperature -20 to +40degC
- EX II 2GD Ex mb IIC T4 Gb  
Ex mb IIIC T135degC Db
- Protection of the electronics is provided by optical grade encapsulation
- The lights are protected against over temperature caused by component failures.
